DETAILED ACTION

Specification

1. **The title of the invention is not descriptive.** A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

2. Figure 1 should be designated by a legend such as --**Prior Art**-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, **the user interface (UI) and load module temperature** must be shown or the features canceled from the claims 3, 9, 10, 15, 20 and 26. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet,

Art Unit: 2821

even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 6, 7, 18, 24 and 28 are objected to because of the following informalities:
 5. Claim 6, line 2, a recitation of "out parameters" should be --outer parameters--.
 6. Claims 7, 18 and 28, a recitation of "a identifiable" should be --an identifiable--.
 7. Claim 24, line 3, a recitation of "DC-AC transform" should be --DC-AC transformer--.
- Appropriate correction is required.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
10. Claim 1 recites the limitation "the voltage that inputted it" in line 4. There is insufficient antecedent basis for this limitation in the claim. The only outer working voltage generated from

Art Unit: 2821

an assistant power circuit is mentioned in the claim and this working voltage is not shown to be inputted to a transformer as claim invention.

11. Claim 5, line 2, recitation of "some detection modules" renders the claim(s) indefinite because the claim not actually includes a number of detection modules, thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

13. Claims 9 and 26, recite the limitation "said load module temperature" in line 2. There is insufficient antecedent basis for this limitation in the claim.

14. Claim 12, recites the limitation "the input voltage" in line 4. There is insufficient antecedent basis for this limitation in the claim.

15. Claim 23, recites of the limitations "the parameters" in line 4, "said outer parameters" in line 6 and "said load module's practical load current" in line 8. There are insufficient antecedent basis for these limitations in the claim.

16. Claims 2-4, 6-8, 10, 11, 13-22, 24, 25 and 27-29 are rejected due to their virtual dependency on the defective claims.

Allowable Subject Matter

17. Indicating a merit of allowance or applying prior arts will be provided according to a response to this office action.
